

XTR39 HAND-HELD LCD CONTROLLER

The new XTR39 LCD touchscreen remote control from Xantech is the ideal compliment to almost any commercial integration project. The XTR39 captures the power and capabilities of a Xantech in-wall LCD touchpanel and places it into a convenient hand-held controller.

The bright, crisp 3.9" color LCD touchpanel screen allows complete customization, and makes for a user-friendly control interface. Dedicated buttons for the most frequently used buttons such as volume, channel, power, and mute are conveniently positioned.

A convenient touchwheel control allows quick scrolling through menus and commands. All screen buttons and icons can be programmed to perform multiple commands with a single touch. Additionally, the XTR39 can be configured to control virtually every major system, such as A/V equipment, lighting, HVAC, and more.

The included charging cradle means that the XTR39 is always easy to locate and ready for use. The Lithium-Ion rechargeable battery insures long battery life between charges.

Features include:

- Vivid 3.9" Color LCD touchscreen display
- Fully customizable screen graphics and functions
- Capable of controlling A/V equipment, lighting, HVAC, screens, draperies and more
- Hard buttons for frequently used commands
- Four easy access programmable macro buttons
- Touchwheel control for quick scrolling through menus and commands)
- Long-life rechargeable Lithium-Ion battery with battery status indicator and charging stand
- Programmed via Xantech's Universal Dragon Drop-IR™ programming software
- Uses same graphics and commands as Xantech Commercial in-wall LCD touchpanels.

XTR39 HAND-HELD LCD CONTROLLER

XANTECH SYSTEM

The XTR39 is part of the comprehensive Xantech system of products that include multi-room A/V distribution and control, in-wall LCD touchpanel controllers, and source components. The XTR39 designed to work seamlessly with the complete Xantech line, and Universal Dragon Drop-IR™ programming software makes it simple to add a convenient LCD touchscreen remote control to a system that performs identically to the wall-mounted LCD touchpanels in the room.

PROGRAMMING

Xantech's new Universal Dragon Drop-IR™ programming software makes it simple to set-up the XTR39 with the same backgrounds, icons, graphics and commands as all other Xantech Commercial SmartPad LCD™ in-wall touchpanels installed in the job. Users will appreciate the consistent look and feel between the XTR39 and Xantech touchpanels. When it's time to update the system, Universal Dragon saves time and effort.

Specifications:

- Processor: ARM7 Microcontroller
- Processor Speed: 50 MHZ
- Memory Size
 - Random Access Memory: 8 MB
 - Flash Memory: 8 MB
- LCD
 - Colors: 256
 - Size: 3.9" Diagonal
 - Number of Pixels: 76,800
 - Orientation: Portrait (240 x 320)
- Touch Screen: Resistive Touch
- Buttons: 11 Touch Positions
- Rotary Wheel: 4 Touch Positions
- Battery Type: Lithium Ion Polymer
- Unit Battery Life
 - Standby on Full Charge: 6 Days
 - Normal Daily Operation: 2.5 Days*
 - Charge Time: 3.5 Hours
 - Delivery Condition: ~80% charged
- RF capable remote (2.4GHz. IEEE 802.15.4)
- Cradle Interface Connector: Molded 8-Pin
- RF Direct Range: 50' to 100'
- RF Frequency: 2.4 GHz
- IR Range: 30'
- IR Learn Capability: Yes
- IR Library: Yes
- Unit Size: 6.5" x 3.5" x 1.1"
- Unit Weight: 10oz (0.28kg)
- Unit Color: Black
- Programmable: Universal Dragon
- Programming Interface: USB 1.1
- Lead Free Unit
- Cradle Specifications
 - Unit Size: 4.5" x 3.75" x 1.25"
 - Unit Weight: 5oz (0.14kg)
 - Unit Color: Black
 - Power Requirements: 5 Volts DC @ 2.5A
 - Unit Interface Connector: Molded 8-Pin

TYPICAL APPLICATIONS:

- Conference Rooms
- Boardrooms
- Training Centers
- Sports Bars
- Restaurants
- Houses of Worship
